

Proposal Title

Participating Lab or Unit

Host Laboratory, University/Institution
Principle contact person | e-mail address

Summary (max 150 words, with optional Swedish summary)

Describe your proposed changes to make your work environment more sustainable in general terms. Briefly describe expected outcomes.

Proposal (1–1 ½ pages)

Elaborate your proposed efforts in detail.

This can include:

- What you expect will be needed to accomplish your goals
- What measurable outcomes you hope to have
- What challenges you may face and how you would address those
- What infrastructure improvements you wish to make (e.g., replacing water-cooled condensers with air-cooled condensers)
- How you will document and/or share your efforts (e.g., preparing posters/signs for distribution and sharing them on the *Towards Greener Research* website, or contributing blog posts for our website)
- Who you plan to involve (e.g., faculty, students, postdocs, administrators)
- How you want to ensure that your proposed work will continue in the long term.

Timeline (¼ page)

Briefly describe your project timeline and anything you have already done. We suggest making a *Gantt* chart for clarity:

Budget (½ page)

Up to 15'000 SEK will be awarded for the best proposals. This money is specifically intended to help you implement your proposed changes. Please only apply for the amount of money needed. Mention if your research/administrative unit plans on contributing financially to the proposed work and an estimate of how much they might contribute. Note that **only Uppsala groups** are eligible for financial support.

If you do not need funding for the proposed work, please leave the *Budget* section blank.

Sharing your project results

Please be aware that grant awardees are required to provide some documentation of their efforts and findings at the end of their project that is shared within the network.

We also have some further questions: would you be willing to...

- 1) ...present your project and findings during the competition final?
Your response
- 2) ...write a blog post on our *Towards Greener Research* website describing your efforts?
Your response
- 3) ...collaborate with other research/administrative units who may have similar goals?
Your response
